Citizen Science

Friends of Skagit Beaches supports volunteer projects that monitor local ecosystems, gather data for researchers, and assist local and state organizations to better understand, manage, and restore habitat for fish and wildlife.

Collecting data for research

Monitoring shorelines & intertidal zones

Forage fish spawning surveys

Interpretive walks

Learning on the beach

Education and Outreach

Join our community of learners. Friends of Skagit Beaches offers high quality educational programs that intrigue, inform and inspire us to learn more and to share what we learn with others.

Join Friends of Skagit Beaches to protect local shorelines and marine ecosystems

Stewardship

The beauty and abundant natural resources of Skagit County shorelines and bays call upon those who enjoy it today to protect them for future generations.

Inspiring the next generation of marine stewards

Protecting our shorelines

Promoting citizen involvement in environmental restoration
